Hi Windsor and Nightingales,

Hopefully you are all well and keeping safe. Thank you to all of you who are accessing the online learning tasks. We are really enjoying seeing your fabulous work.

There are new activities on Activelearn Reading Bug, Grammar and Spelling Bug, My Maths, Education City and Century Tech Learning, for you all.

Make sure you check out your weekly writing task too – this week 'Animals'.

For topic this week we would like you to go on your own bug hunt. What bugs can you find and identify? There are lots of bugs in gardens at this time of year, from slugs and snails, millipedes and centipedes to woodlouse and ants. Bumble bees are buzzing about too. How many can you find and identify? If you are struggling to identify some of your bugs, then there are lots of bug identification charts online. Just google 'garden bug identification'.

Once you have been on your bug hunt, we would like you to list what you have found and then pick your favourite bug and do a little internet research. From your research we would like you to draw a labelled diagram of your bug. Maybe you could use your favourite bug for your writing task too?

Remember to leave any bugs unharmed where you find them and we look forward to seeing your work.

Email: windsor@ksmacademy.com or nightingales@ksmacademy.com

Keep safe and keep busy,

Mr Lawton and Miss Firkins
