Close contact means:

R15

- anyone who lives in the same household as someone with coronavirus (COVID-19) symptoms or who has tested positive for coronavirus (COVID-19)
- anyone who has had any of the following types of contact with someone who has tested positive for coronavirus (COVID-19) with a PCR or LFD test:
  - face-to-face contact including being coughed on or having a face-to-face conversation within 1 metre
  - been within 1 metre for 1 minute or longer without face-to-face contact
  - sexual contacts
  - been within 2 metres of someone for more than 15 minutes (either as a one-off contact, or added up together over one day)
  - travelled in the same vehicle or a plane

**The level of risk is calculated by:**

**The likelihood**

**x**

**The Consequence**

- 1- Very unlikely
- 2- Unlikely
- 3- Fairly likely
- 4- Likely
- 5- Very likely

- 1- Insignificant (no injury)
- 2- Minor (minor injury needing first aid)
- 3- Moderate (up to 3 days absence)
- 4- Major (more than 3 days absence)
- 5- Catastrophic (death)

**Risk rating:**

1 – 4	<b>Low</b> (acceptable)	No further action required
5 – 9	<b>Medium</b> (adequate)	If risk cannot be lowered any further, consider risk against benefit. Monitor and look to improve at next review
10 – 16	<b>High</b> (tolerable)	Identify further control measures to reduce risk rating. Seek further advice e.g. line manager, H&S team, etc.
17 - 25	<b>Very High</b> (unacceptable)	Do not undertake the activity. Implement immediate improvements
